THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. **PROSECUTION ON THE MERITS IS CLOSED.** THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN **THREE MONTHS** FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. **THIS STATUTORY PERIOD CANNOT BE EXTENDED.** SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

PART B - FEE(S) TRANSMITTAL

Complete and send this form, together with applicable fee(s), to: Mail **Mail Stop ISSUE FEE**
Commissioner for Patents
P.O. Box 1450
Alexandria, Virginia 22313-1450
or Fax **(571)-273-2885**

INSTRUCTIONS: This form should be used for transmitting the ISSUE FEE and PUBLICATION FEE (if required). Blocks 1 through 5 should be completed where appropriate. All further correspondence including the Patent, advance orders and notification of maintenance fees will be mailed to the current correspondence address as indicated unless corrected below or directed otherwise in Block 1, by (a) specifying a new correspondence address; and/or (b) indicating a separate "FEE ADDRESS" for maintenance fee notifications.

CURRENT CORRESPONDENCE ADDRESS (Note: Use Block 1 for any change of address)

Note: A certificate of mailing can only be used for domestic mailings of the Fee(s) Transmittal. This certificate cannot be used for any other accompanying papers. Each additional paper, such as an assignment or formal drawing, must have its own certificate of mailing or transmission.

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b) (application filed on or after May 29, 2000)

The Patent Term Adjustment to date is 515 day(s). If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the Patent Term Adjustment will be 515 day(s).

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (<http://pair.uspto.gov>).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

REASONS FOR ALLOWANCE

The main reason for the allowance of claims 1-12 is the instantly claimed a hydrocyclone for effecting separation of a combined phase input stream with at least two constituents comprising: inner and outer spaced shells which are concentric with a longitudinal axis and each of which has an inner surface and an outer surface, the outer shell having an inner surface radius with respect to said longitudinal axis which is greater than the radius of the outer surface of the inner shell with respect to said axis to form therebetween a cyclone chamber providing a helical path for the stream, the shells having an input opening therebetween at one end of the cyclone chamber for receiving the stream and an output opening therebetween at the opposite end of the cyclone chamber for discharging separated constituents of the stream; wherein the inner surface of the inner shell is spaced from the longitudinal axis and defines an inner shell bore which has one end at and which extends from the chamber output opening to adjacent the chamber input opening for conveying a separated constituent to an end of the bore adjacent the chamber input opening; at least one wall forming an expansion chamber which is within a circle lying in a plane perpendicular to and centered on the longitudinal axis and having a radius not more than 30% greater than the radius of the outer surface of the outer shell, said expansion chamber having a first opening which opens to the input opening of the cyclone chamber and a second opening spaced from the first opening for providing the input stream to the expansion chamber, the spacing of the first opening and the second opening and the dimensions of the expansion

chamber being selected to substantially reduce the velocity of the input stream, at least by the time that the stream reaches the input opening of the cyclone chamber, with respect to the velocity of the input stream at the second opening of the expansion chamber; and a tubular extension of the inner shell extending from the end of the bore of the inner shell adjacent the input opening of the cyclone chamber to exteriorly of the expansion chamber.

The main reason for the allowance of claims 13-20 is the instantly claimed a hydrocyclone for effecting separation of a combined phase input stream with at least two constituents comprising: inner and outer spaced shells which are concentric with a longitudinal axis, the outer shell having a radius with respect to said longitudinal axis which is greater than the radius of the inner shell with respect to said axis and the inner and outer shells form therebetween a cyclone chamber providing a helical path for the stream, the shells having an input opening therebetween at one end of the cyclone chamber for receiving the stream and an output opening therebetween at the opposite end of the cyclone chamber for discharging separated constituents of the stream; the inner shell having a bore which has one end at the chamber output opening and which extends from the chamber output opening to adjacent the chamber input opening for conveying a separated constituent to an end of the bore adjacent the chamber input opening; at least one wall forming an expansion chamber with a first opening which opens to the input opening of the cyclone chamber and a second opening which opens in the direction substantially parallel to the longitudinal axis and which is spaced from

the first opening for providing the input stream to the expansion chamber, the spacing of the first opening and the second opening and the size of the expansion chamber being selected to substantially reduce the velocity of the input stream at the input opening of the cyclone chamber with respect to the velocity of the input stream at the second opening of the expansion chamber; and a tubular extension of the inner shell extending from the end of the bore of the inner shell adjacent the input opening of the cyclone to exteriorly of the expansion chamber.

The main reason for the allowance of claims 21-29 is the instantly claimed hydrocyclone for effecting separation of a combined phase input stream with at least two constituents comprising: inner and outer spaced shells which are concentric with a longitudinal axis, the outer shell having a radius with respect to said longitudinal axis which is greater than the radius of the inner shell with respect to said axis and the inner and outer shells form therebetween a cyclone chamber providing a helical path for the stream, the shells having an input opening therebetween at one end of the cyclone chamber for receiving the stream and an output opening therebetween at the opposite end of the cyclone chamber for discharging separated constituents of the stream; the inner shell having a bore which has one end at the chamber output opening and which extends from the chamber output opening to adjacent the chamber input opening for conveying a separated constituent to an end of the bore adjacent the chamber input opening; an expansion chamber with a first opening which opens to the input opening of the cyclone chamber and a second opening which opens to exterior of the cyclone

chamber and which is spaced from the first opening for providing the input stream to the expansion chamber, the spacing of the first opening and the second opening and the size of the expansion chamber being selected to substantially reduce the velocity of the input stream at the input opening of the cyclone chamber with respect to the velocity of the input stream at the second opening of the expansion chamber; and a tubular extension of the inner shell extending from the end of the bore of the inner shell adjacent the input opening of the cyclone to exteriorly of the expansion chamber.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
